ElectricianPass: Licensed Electrician Certification with the reliability of PPC

- *Obtain the Licensed electrician certificate easily, quickly, and with the reliability of PPC*
- *Schedule appointments at the customer's convenience*
- *Flexible payment options*

With a customer-centric approach, PPC introduces a new service that ensures the seamless, secure, and reliable acquisition of the Licensed Electrician Certification.

The LEC certifies that an electrical installation is compliant and safe for use. It is required for all properties undergoing electrical work and must be renewed as mandated by law.

Through the ElectricianPass service, PPC facilitates the issuance of the LEC by a certified team of electricians. The service is end-to-end, requiring no action from customers. It is fast, efficient, and allows customers to schedule appointments at their convenience. Additionally, payment can be made flexibly, either in installments or once-off.

ElectricianPass is available to PPC's residential and business customers for properties with electrical power of up to 35kVA, covering almost the entire country.

Interested customers can visit any of PPC's 124 branches nationwide or contact PPC's 24/7 customer service line at 800-900-1000 for residential customers and 800-500-7000 for business customers.
