A5 TARRIF
FOR COMPETITIVE & REGULATED CHARGES
(applicable to electricity consumptions to be made from 1.1.2014 to
31.12.2014)

REMARKS ON THE A5 TARIFF

With regard to the ALUMINIUM S.A. billing concerning the competitive charges (Energy & Capacity charge + CO₂ charge) of the A5 tariff, we clarify the following:

- The charge related to the Energy & Capacity part will remain stable all over the year and will amount to 55.57€/MWh.
- Moreover, the CO₂ rights charge is calculated monthly based on a specific readjustment clause, which is described and detailed in the A5 tariff.

Indicatively, based on the CO₂ data for the time period January-October 2013, the CO₂ charge, according to the readjustment clause, is set to 3.57 €/MWh.

Therefore, the total competitive charge (Energy & Capacity+CO₂) is set to **59.14 €/MWh** (55.57 €/MWh + 3.57 €/MWh).

Following volume discount of **10%** on the aforementioned price, the price for the total competitive charge is set to **53.23 €/MWh**.
