CO2

- We have impacted our 9M08 financial results with € 108.7 mil. for CO2 emission rights (€ 51.8 mil. for 3Q 08), accounted for the period, although the actual expense will be incurred in the 4Q08.

- Hence, for 9M 08 :

EBT with CO2 cost = € 258.3 m

CO2 cost = € 108.7 m

EBT before CO2 cost = € 149.6 m

Total Energy Balance 9M '08 vs. 9M '07 :

Expense Increase € 713 m (of which € 568 m due to fuel and energy price increases)

- Due to the decrease in lignite generation (1,418 GWh) and the overall increase in demand (1,149 GWh), PPC resorted to expensive fuels and energy purchases.
- Only 50.8% of the energy sold was generated by domestic energy sources (lignite, hydro, RES)

1) Including PPC renewables generation 146 GWh in 9M 08 & 139 GWh in 9M 07

Interconnected System Energy Balance 9M '08 vs. 9M '07

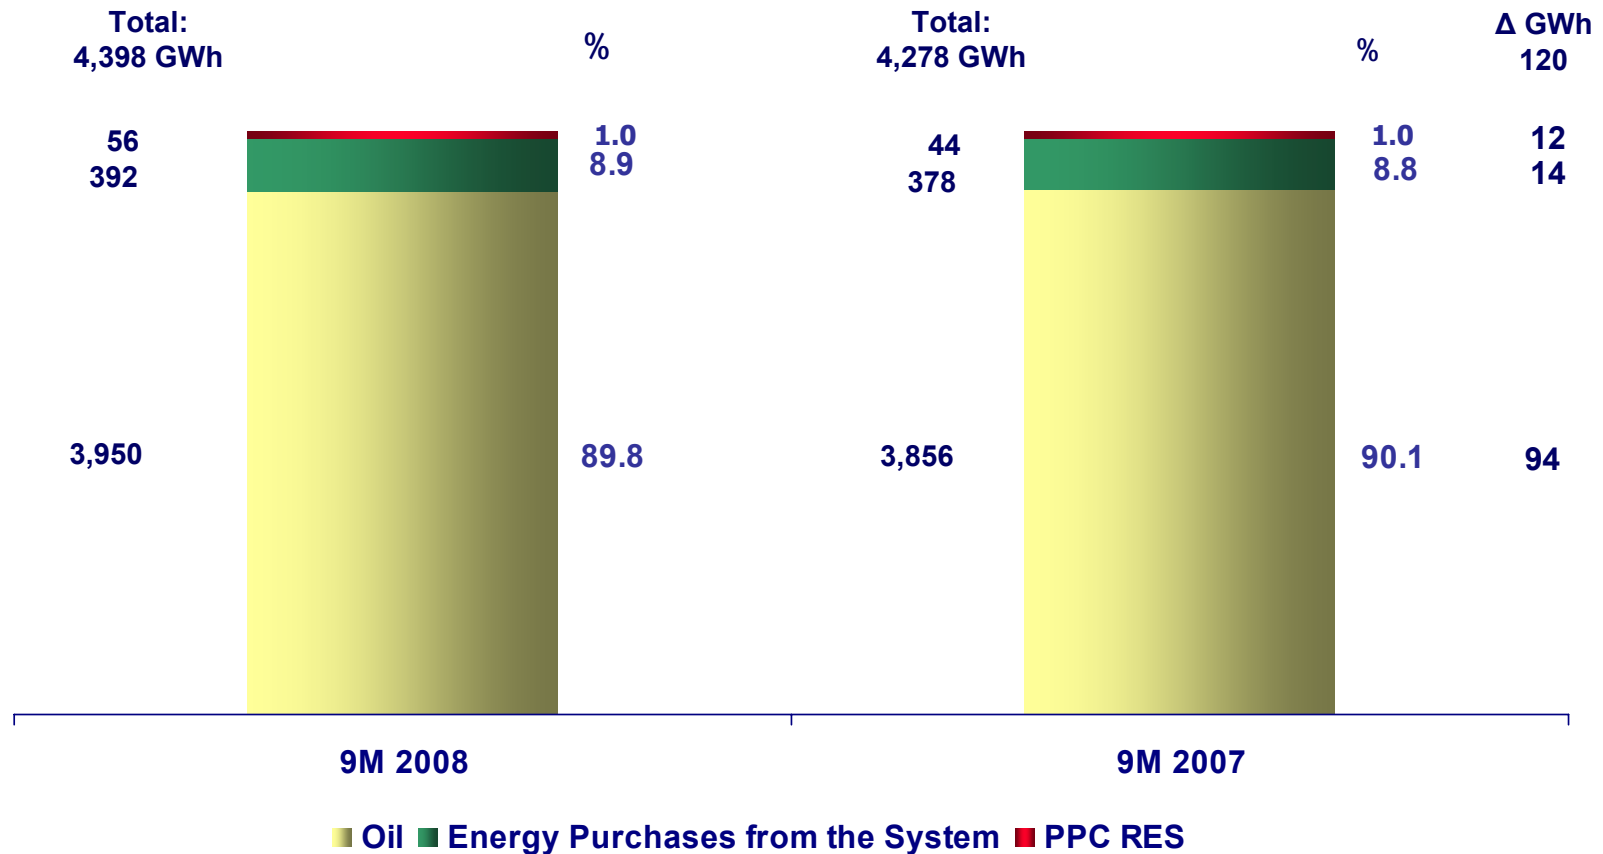

- Expense Increase €557 m (of which €407 m due to fuel and energy price increases)

¹ Including PPC renewables generation 90GWh in 9M08 & 95GWh in 9M07

Non-Interconnected System Energy Balance 9M '08 vs. 9M '07

- Expense Increase €156 m (€161 m due to fuel price increases, and €5 m positive impact from substituting diesel generation with HFO generation).

Total Energy Balance 3Q '08 vs. 3Q '07

1) Including PPC renewables 78GWh in 3Q' 08 & 55GWh in 3Q' 07

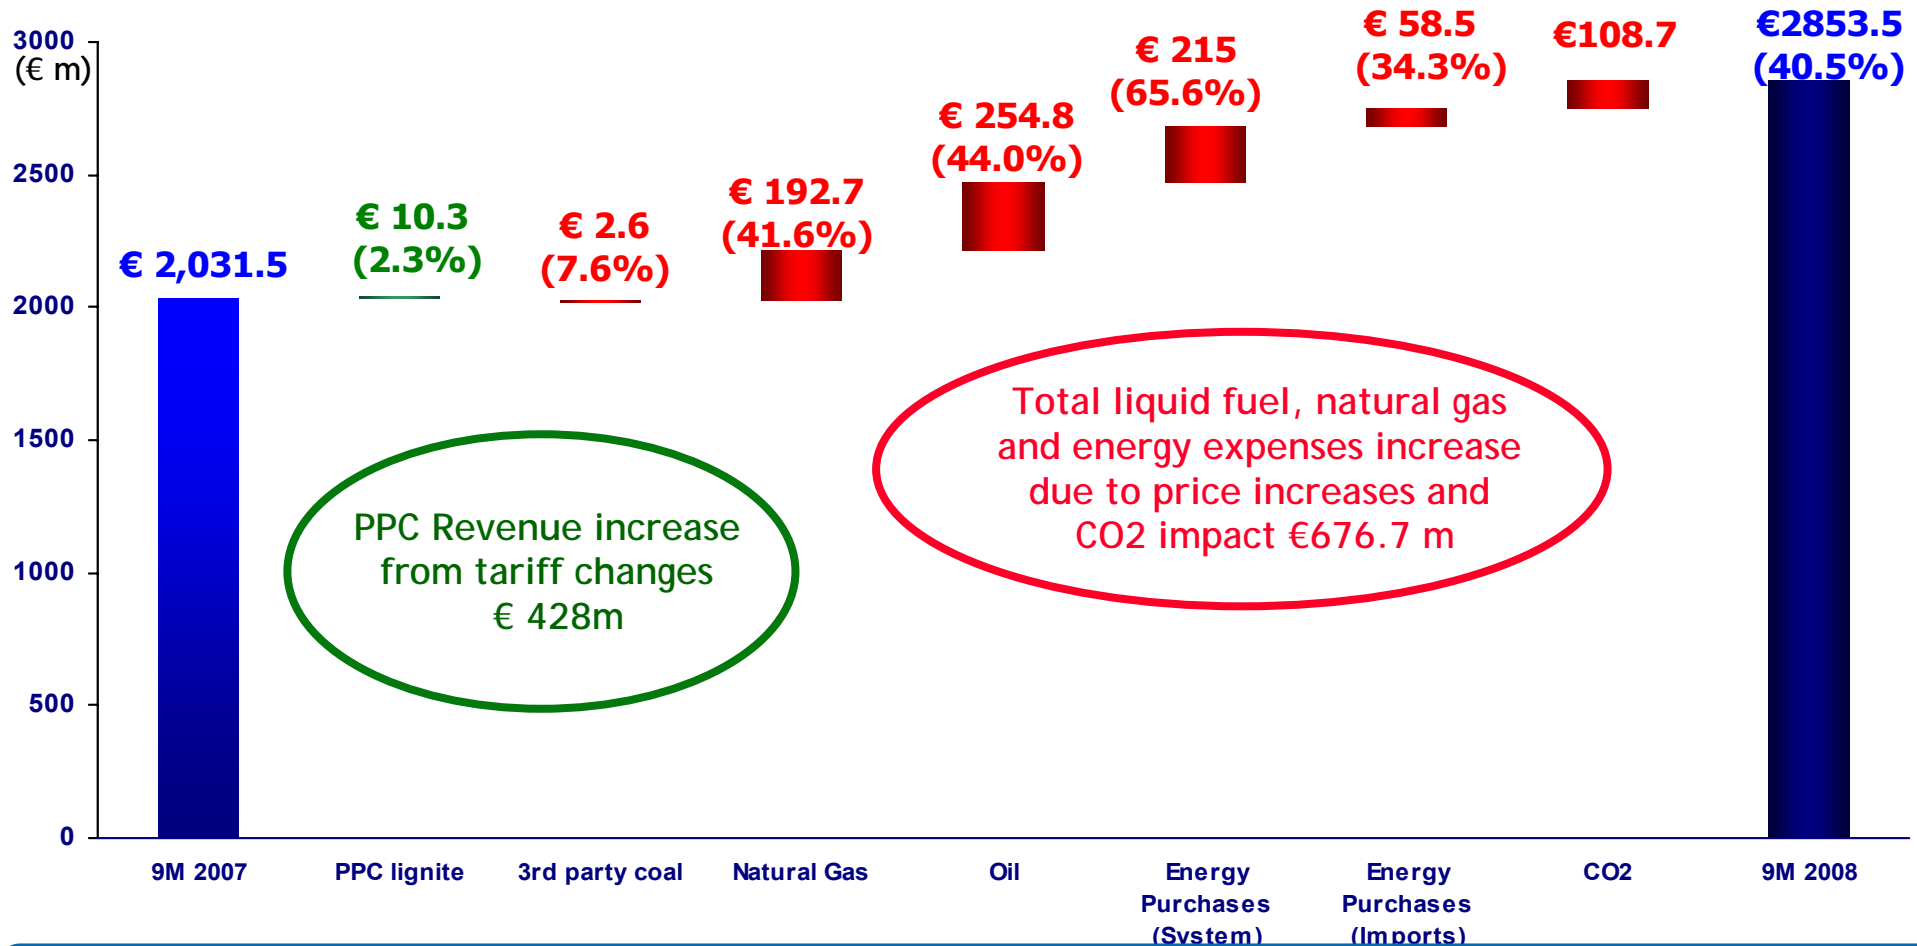

Evolution of Average Fuel and Energy Prices paid by PPC in 9M '08

	Price Increases (%)	9M '08 Quantities	Quantity Increases (%) 9M 08 vs 9M 07
Fuel-oil (€/tn)	51.4%	1,280,172 tn	9.4%
Diesel-oil (€/klt)	31.5%	421,303 klt	-11.5%

System Marginal Price (€/MWh)	40.1%	5.760 GWh	27.2%
PPC Imports (€/MWh)	5.6%	2.745 GWh	24.5%

Total Energy Expenditure 9M '08 vs. 9M '07

Expense increase of € 568 m due to fuel and energy price increases, and € 108.7 due to CO2 emissions for a net impact of € 676.7m on non-controllable expenses

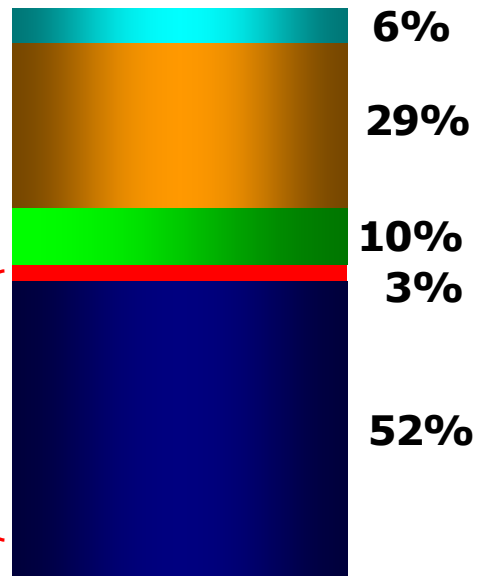

The price effect of the unprecedented rise in fuel and electricity costs coupled with the impact of CO2 emissions exceeded the significant revenue increase that resulted from tariff changes, by €249m

Fuel, other energy costs and EBITDA as percentage share of Revenues (9M 2008/9M 2007)

TOTAL REVENUES

€ 4,416 mil.

55% of revenue was directly exposed to the fluctuation of international fuel and CO2 prices vs 41% in 9M 2007

9M 2008

TOTAL REVENUES

€ 3,842 mil.

9M 2007

Recent Developments

Dr. Takis Athanasopoulos
*Chairman of the Board, and
Chief Executive Officer*

2008: a year of unprecedented fuel and energy price increases, resulted in significant losses

Price indices, Jan 2007 = 100

•If fuel and energy prices had remained at 2007 levels and there was no impact from CO2 emissions, PPC would have pre-tax profits of € 419m for the 9m 2008

Major operational developments

- **4 bids submitted for Megalopolis V 800MW CCGT on 25/11/08**

- **Extension granted for the tender of Florina II 450 MW lignite plant to February 2009**

- **Progress in the JV PPC-Halyvourgiki for the construction and operation of an 880 MW CCGT thermal plant**
 - **terms of collaboration and new company incorporation approved by the BoD**
 - **appointment of Owners' Engineer for the project**

- **Progress in JV PPC-RWE-Titan for the construction and operation of an 800MW hard coal plant in Albania**
 - **Pre-feasibility study completed in August. Proceeding with feasibility study.**

Going Forward: Management committed to reposition PPC for performance and growth

■ Achieve Cost Saving Targets

- cumulative savings of €2.2 bn over the period 2009-2014 resulting gradually in annual savings of €500m (2008 prices) by 2014

■ Maintain leadership position in the liberalized electricity market

- planned investments will replace old, inefficient and polluting plants and allow PPC to have a 72% generation share in the wholesale market

Going forward: 2009 Outlook

In 2009, we expect profitability to make a significant turnaround, mainly due to:

- **expectations for lower oil prices**
- **the carry-over effect of the 7% tariff increase, effective July 1st 2008**
- **efficiency improvements kicking in**
