PPC: Innovative green energy benefits and Guarantees of Origin for business customers

PPC introduces new, innovative benefits for business customers, further strengthening its commitment to sustainability and accuracy in energy consumption monitoring and management. With a focus on transparency and adherence to environmental standards, PPC now offers:

- **Guarantees of Origin (GOs) management:** Full transparency in the reporting and management of Guarantees of Origin, with the ability for large corporate customers to monitor where and when the energy they consume is produced, even on an hourly basis. This enables full traceability of green energy and accuracy in emissions reporting.
- **Sustainable entrepreneurship:** Business customers can obtain accurate reporting of Scope 2 emissions, facilitating compliance with environmental and regulatory requirements and enhancing their efforts to reduce carbon footprints and achieve ambitious net-zero targets.

Through these initiatives, PPC consolidates its position as a leader in the transition to a green and sustainable economy. In partnership with Granular Energy, a leading software company in the clean energy sector, PPC delivers cutting-edge solutions for monitoring green energy consumption and CO₂ emissions reporting, thus enhancing transparency and providing customers with detailed and accurate insights into their energy choices.

Sustainability and customer orientation at the core of PPC's strategy

PPC remains steadfast in placing customer needs at the center of its strategy, delivering solutions that address energy requirements, while promoting sustainability aligning its services with evolving customer demands, PPC creates services that respond to the challenges of the new electrification and energy transition.

PPC consistently redefines its role in the energy sector, by driving innovation and embedding sustainability and customer-centric principles into its operations.. As a dynamic and forward-thinking organization, PPC is evolving to lead the market, delivering products and services that not only meet but exceed customer expectations in the era of green energy.
