ANNEX I REMUNERATION POLICY

PPC EXECUTIVES' VARIABLE REMUNERATION SYSTEM (PPC EVRS)

Preamble

This System specifies matters relating to the manner and conditions of granting an additional incentive in the form of variable gross remuneration linked to short-term targets (bonus), which is provided to executives and senior executives of the Company.

The purpose of establishing this System is to align the executives towards achieving the Company's goals, better understanding their role, developing a corporate culture that supports teamwork and efficiency and, finally, the recognition by the Company of the efforts of the executives and their contribution to its results.

A. SYSTEM CHARACTERISTICS

1. General

- i. Variable Remuneration is earned over a period of one calendar year (365 days) and is not included in the fixed pay.
- ii. It is awarded in proportion to the number of days of actual performance of duties of any executive entitled to it, during the reference year and under the condition that he/she has actually performed his/her duties for at least 90 calendar days whether with physical presence or remotely, including annual leave days. Days of actual performance of duties, following their entitlement to receive variable remuneration as set forth above, shall also include sick leave up to three (3) months and innocent absenteeism up to one (1) month.

2. Beneficiaries

Variable Remuneration is paid to the Chief Executive Officer, the Deputy CEOs, the Chief Officers and the Directors of PPC SA, as well as to the respective executives of PPC Renewables, subject to the adoption of a similar Variable Remuneration Policy and System by the latter, upon relevant resolution of the General Meeting.

3. Maximum Amount of Variable Remuneration

The Maximum Amount of Variable Remuneration per beneficiary executive shall be defined in the approved Remuneration Policy of PPC, as in force each time. Currently it has been set as a percentage of the annual gross fixed salaries of the beneficiary executives, namely 50% of the annual gross fixed salary for the Chief Executive Officer, the Deputy CEOs and the Chief Officers, and at 30% for the Directors.

This Policy determines the possibility of increasing the above Maximum Amount of Variable Remuneration up to 50% in case of overachievement of the targets set under the terms and conditions of chapters B to H hereof.

4. Time of payment of variable remuneration

The variable remuneration shall be paid to the beneficiary executives in the year following the reference year and within three (3) months after the approval of the consolidated Financial Results of the Group for the reference year.

B. FRAMEWORK FOR GRANTING VARIABLE REMUNERATION

The targets that will be included in the system of variable remuneration are related to the achievement of results at the level of Group and Company-Business Unit, and if possible also at the level of Division/Business Unit and reflect the performance of managers per level.

1. Categories - characteristics of targets

Three (3) categories of targets are adopted, focused on the financial strength of the Group, the achievement of its strategic and operational priorities and the adoption of good practices regarding issues of environmental protection and sustainable development (ESG).

These targets are clearly described in Chapter C below and are defined in such a way in order to be defined in terms of time and achievable, and they have different contribution rates as follows:

Target Categories	Percentage contribution to Annual Variable Remuneration (%)
Financial (C1)	50%
Strategic / Operational (C2)	40%
Environment and sustainable development (C3)	10%

The above percentage contribution of each target category to the final outcome may be adjusted by Decision of the Board of Directors, upon recommendation of the Remuneration & Recruitment Committee within a range of $\pm 30\%$ of the above values per target category, based on the strategic priorities of the Company. The sum of the weight of all targets per category must be equal to 100% while the rating scale for measuring the level of achievement of the measurable targets ranges from 1 to 100.

For the measurement of the level of achievement of the measurable targets "Key Performance Indicators" (KPIs) and/or performance indicators of the Company will be used as measurement indicators.

The contribution of the indicators is key for (a) the strategic planning and the alignment of the targets of the Business Units with the targets of the Company, (b) the optimization of the efficiency of the Company and (c) the identification of areas for improvement.

The above targets are set each year by the Board of Directors at Group level and constitute the targets of the Chief Executive Officer, while the targets of the first two categories (C1 & C2) are further broken down to Department level, where possible, according to Chapter F hereof.

2. Target allocation

By way of example and without any limitation, regarding target allocation to the beneficiary executives below CEO level, the following apply:

- The targets of the Group must be allocated in a manner compatible with the business plan and/or the individual strategic priorities, initially at company level (PPC-PPPC Renewables) and then at the level of executives within each company of the Group,

so as to ensure directly or indirectly the achievement of the targets of each company and ultimately of the Group.

- The individual allocated targets may be quantitative/ measurable and/or qualitative and/or related to human resources development and/or related to projects for improving the operation of the Unit.
The percentage contribution of each individual target to the final result of its category varies depending on the strategic priorities of each year and each Business Unit.
The sum of the weight of all individual targets of each category, per Unit/Executive, must be equal to 100% and the rating scale for measuring the level of achievement of the overall measurable targets ranges from 1 to 100. Each individual target must be clearly described.
- Key Performance Indicators (KPIs) of measurable targets can vary depending on the target category. In each case the measurable targets will be linked to measurement indicators and will be assessed through them.
- In cases where it is not possible to allocate a target to a lower-level Unit/Executive, then the target of that Unit/Executive is identical to the target of the immediately higher-level Unit/Executive, and so on up to Group level.
In such a case, executives of all levels with a common target are called upon to jointly contribute to its achievement.

C. TARGET CATEGORIES

C1. Financial targets

Financial target at Group level are set by the Board of Directors of PPC SA and allocated by the Chief Executive Officer to the Group companies, the Operations, the Group Divisions/Business Units and the Departments reporting to the CEO.

Then, where possible, these targets are allocated and assigned by the Heads of PPC Renewables, the Operations and the Group Divisions to the units reporting to them, etc., otherwise independent individual targets however affecting indirectly the corresponding target of the higher-level unit are assigned to the lower-level units.

If it is not possible to set an individual/partial target that directly or indirectly affects the target of the higher-level unit, then the targets of the higher and the lower-level units are identical. The percentage contribution of each financial target, after being allocated as per the above, to the level of target achievement per level of executive and activity is shown in the following Table I.

TABLE I
ALLOCATION OF FINANCIAL TARGETS ACHIEVEMENT PER LEVEL & OPERATION

	Beneficiary executives	GROUP PERFORMANCE	OPERATIONS & DT PERFORMANCE	DIVISION/ BUSINESS UNIT PERFORMANCE	DEPARTMENT PERFORMANCE

8	Directors of Departments reporting a)to Chief Officers who report to Heads of Operations & b) to the CDSDO & the Ce-MO (4)	20%	10%	20%	50%

C2. Strategic/Operational targets

The strategic / operational targets at Group level shall be set by the Board of Directors and shall be allocated by the Chief Executive Officer to the Group companies, the Operations, the Divisions of the Group and to the Departments directly reporting to him.

Then, where possible, these targets shall be allocated by the Heads of PPC Renewables, Operations and Group Divisions to units reporting to them etc., otherwise separate individual strategic/operational targets shall be set to the lower-level units which, however, indirectly affect the corresponding target of the higher-level unit. If it is not possible to set an individual target that directly or indirectly affects the target of the higher-level unit, then the targets of the higher and lower-level units shall be identical.

These targets must be wide-ranging so as to be allocated, either directly or indirectly, to the lower-level units. The percentage contribution of each strategic/operational target in the total contribution of this category (C2) in the variable remuneration, shall be determined for each executive by his/her superior in the hierarchy.

These targets shall not be more than three, one of them shall be set only at Group level, shall not be assigned, and each executive shall have the individual target to achieve the said target as a whole; its percentage contribution to Category C2 shall be common to all executives and shall be determined by the Board when setting the target.

As Strategic/Operational targets may be, including but not limited to, the implementation of the decommissioning program and/or withdrawal of environmentally unfriendly units, the increase of RES installed capacity, the acceleration of engineering, licensing & construction procedures for installing new RES capacity, the reduction of CO₂ emissions from power generation, the reduction of Thermal Power Plants' generation cost, the reduction of overdue receivables, the increase in customer satisfaction rate, the increase of market share in profitable market segments, the expansion in new markets, the implementation of e-mobility infrastructure, etc.

C3. Targets related to the environment, sustainability and sustainable development

The targets which are related to the environment, sustainability and sustainable development at Group level shall be determined by the Board of Directors and set only at Group level, shall not be further assigned and each executive shall have as individual target the achievement of these targets as a whole.

Targets related to the environment, sustainability and sustainable development may include but not limited to, investments in new activities in the decarbonization areas, the number of facilities with certified Environmental Management Systems, the participation of employees in corporate responsibility initiatives, the number of awards for Environmental initiatives.

D. EVALUATION OF TARGETS

The evaluation of target achievement in all target categories shall be carried out by measuring the level of achievement of the quantitative targets or/and by examining the level of implementation of the qualitative targets (targets on/off) and shall determine the amount of variable remuneration to be granted.

E. CALCULATION OF THE TOTAL AMOUNT TO BE PAID IN CONJUNCTION WITH THE PERCENTAGE OF TARGET ACHIEVEMENT

The total percentage of target achievement, per beneficiary executive, shall be calculated as the sum of the products of the contribution percentages of each target category to the variable remuneration multiplied by the total percentage of achievement of this target category for the said executive. The above are depicted as follows:

Total % of target achievement = [50% x (total % of achievement of financial targets)] + [40% x (total % of achievement of strategic/operational targets)] + [10% x (total % of achievement of environmental targets)].

Variable remuneration shall be granted under the condition that the above percentage exceeds 70%. Moreover, there is a gradual granting of the total amount of variable remuneration with linear relationship, according to the following Table II:

TABLE II
RATING SCALE FOR GRANTING VARIABLE REMUNERATION
(IN RELATION TO THE TARGET ACHIEVEMENT LEVEL (%))

OVERALL PERCENTAGE OF TARGET ACHIEVEMENT (%)	PERCENTAGE OF VARIABLE REMUNERATION TO BE GRANTED (%)
<70	0
70-100	30 - 100 (linearly related to the overall percentage of target achievement)
100-120	100-150 (linearly related to the overall percentage of target achievement)

Based on the above, the total amount of the annual variable remuneration to be granted is equal to the product of the percentage of variable remuneration to be granted, pursuant to the second section of par. A3 hereof.

F. TARGET SETTING AND EVALUATION PROCEDURE

1. Definition and Allocation of Business Targets

- 1.1 Upon the approval of the annual regular budget and based on the strategic priorities and/or the Business Plan of the Company, the Board of Directors shall define the goals of the Group in the context of the present System (according to the above three (3) categories). 2.4 The reports for all executives shall be forwarded to the Finance Division (F/Di), which shall calculate the amount of the variable remuneration entitled for each executive, based on the second item of paragraph 3 of Chapter A and according to the overall level of target achievement, under Table II.

2.5 A relevant table of the corresponding amounts shall then be compiled and forwarded to the Human Resources & Organization Division (HRO/Di) for the payment of the amounts to the executives.

4. ACTIVATION OF THE PLAN-PERFORMANCE INDICATOR

The Key Performance Indicator (KPI) for activation and calculation of the performance, for the purposes of this Plan, is the Company's Total Shareholder Return, as this indicator is directly linked to the total performance of the listed Company.

The Company's Total Shareholder Return (TSR) is calculated as follows:

$TSR = [(P_1 - P_0) + \mu] / P_0$ where,

P_1 : the closing price of the share on 31 December of the second year (maturity year) of the reference cycle (year n+1);

μ : the sum of any dividends distributed over the years of the reference cycle (years n & n+1)

The target that activates the Plan for each cycle shall be determined, without prejudice to paragraph 9, by a Resolution of the Board of

Directors, which shall be authorized to determine those targets and the targets of overachievement, taking into account:

- a. **the Total Shareholder Return (TSR)** for the distribution of a number of shares equal to 0.1% of the total number of shares (targets achievement at 100%) and in addition
- b. **a sustainability and sustainable development clause** for the distribution of a number of shares exceeding 0.1% of the total number of shares (targets achievement higher than 100%).

Finally, the Board of Directors of the Company is authorized, upon recommendation from the Remuneration and Recruitment Committee, to determine by Resolution different and/or additional Key Performance Indicators (KPI's).

- Before the start of each cycle of the Plan, the targets of the cycle shall be set and the distribution of shares shall take place once the specific targets have been achieved on December 31 of the second year (maturity year) of that cycle.
- The total number of shares offered in each cycle is chosen to constitute 0.1% of the total number of the Company's shares, i.e. 232,000 shares (232,000,000 x 0.1%).
- The distribution of a higher number of shares is also envisaged in the event of overachievement of the targets, up to a maximum of 0.2% per cycle, using the following rating scale:

The plan rewards teamwork and overall contribution of the executives to the end result and for this reason the equal distribution of shares between executives of the same level is adopted.

The allocation is presented in the following table and applies to the executives holding the following positions of responsibility at the beginning of the Plan, while the percentage of shares attributable to

each class of beneficiaries does not change in the event of an overachievement:

Beneficiary Classes		% of the shares to be offered
1	CEO of PPC S.A.	6%
2	CEO of PPCR, Deputy CEOs of PPC, Chief Officers	50%
3	Directors of Departments (PPC & PPCR)	44%

In case one of the above beneficiaries assumes a position of responsibility during a cycle of the Plan and not at the beginning of it, then, depending on the time of his/her inclusion to the Plan, the beneficiary will receive a proportion of the total number of shares he/she is entitled to. (Share Ratio (SR) = number of days / 730).

The last inclusion in a specific cycle of the Plan is the 30th of June of the second maturity year of this cycle.

The calculation of the distributed shares of each class of beneficiaries of a cycle shall be carried out sequentially as follows:

- i. Calculation of the number of eligible shares for the CEO of PPC S.A. If the CEO is not entitled to all the shares of the cycle, due to his/her participation in a part of it, the number of shares attributable to him/her shall be calculated, by numerical rounding, as follows: ($S = SR \times \text{number of eligible shares}$). Any remaining shares are transferred to Class 3.
- ii. Divide the number of Class 2 (A) of the shares to be distributed by the total number of beneficiaries (X) and the initial number of shares per beneficiary (a) is obtained.
- iii. For the part of the beneficiaries (Y) who receive a percentage of the above result, due to their participation in a part of the cycle, the number of shares attributable to them, by numerical rounding, shall be calculated as follows: ($S1... Y = AS1... Y \times a$).
- iv. The sum of the shares in the previous case ($B = \Sigma S1... Y$) is deducted from A resulting to the total number of shares offered ($C=A-B$) to the beneficiaries of Class 2 with full participation in the plan cycle, identified as follows ($Z =X -Y$).
- v. The number C shall be divided by the number of beneficiaries of Class 2 with full participation in the plan cycle (Z) and the number of shares attributable to them shall be calculated, without rounding. Any remaining shares are transferred to Class 3.

- vi. The steps from ii. to v. regarding Class 3 are repeated. Any remaining shares in this Class are not distributed but are used as a reserve for the next cycle of the plan, etc.
